
please organize your portfolio links

Posted by sstark - 2007/06/28 22:51

I have noticed a lot of portfolios being listed in the root folder. Until today these listings were not shown in the directory. I decided to show them, but can you please do your best to put them in one of the categories? Feel free to add a category if you need a new one.

Thank you.

p.s. - there was a bug that would delete the category listing information when editing the posting, but I fixed it. let me know if this is still happening to anyone. thanks.
